

BB-BJZ Cycloidal Gear Pump's Motor Group (Vertical & Horizontal)

Introduction

BB-BJZ gear pump motor group (horizontal) is widely used in machine tools, hydraulic machinery, engineering machinery, hydraulic systems, as a power source system can also be used to thin oil station, lubrication pump, fuel pump. Gear pump motor means for conveying a viscosity of 1 ~ 8° mineral oil, metallurgy, mining, petroleum, chemical, textile machinery And other equipment in for the pump, oil temperature at 10 °C ~ 60 °C , such as Hydraulic oil, oil, fuel oil.
