

CB-BJZ Gear Pump's Motor Group (Horizontal)

Introduction

CB-BJZ gear pump motor group (horizontal) is widely used in machine tools, hydraulic machinery, engineering machinery, hydraulic systems, as a power source system can also be used to thin oil station, metallurgy, mining, petroleum, chemical, textile machinery and other equipment in for the pump, lubrication pump, fuel pump. Gear pump motor means for conveying a viscosity of 1 ~8 ° mineral oil, oil temperature at 10 °C ~ 60 °C , such as hydraulic oil, mechanical oil, fuel oil.
